

Environmental Policy

The BESC is committed to **protect the environment and the community** in which we conduct our activities. It is our policy to seek **continual and sustainable improvement** throughout our activities and operations to lessen our impact on the local and global environment by conserving energy, water and other natural resources; reducing waste generation; recycling and reducing our use of toxic materials. We are committed to **environmental excellence and pollution prevention**, meeting or exceeding all environmental regulatory requirements, and to purchase products which have greater recycled content with lower toxicity and packaging, which in turn reduces the use of natural resources.
