

From the desk of the Editor-in-Chief

The great moment of happiness and expectation is to convey my deep embrace to the **Coherence: A Scientific Journal** team to launch the inaugural issue of this journal. On behalf of the **Coherence: A Scientific Journal** editorial board, I would like to extend a cordial welcome to the readers of the journal and express our gratitude all the authors, members of the editorial board and distinguished reviewers, who have voluntarily contributed their time, effort and expertise to make the issuance of the journal successful.

The journal **Coherence: A Scientific Journal** is primarily focused on research and review work based on contemporary multidisciplinary topics in science and technology. This peer-reviewed journal comprises of nine (9) outstanding research write-ups of teachers and their students from the departments of Chemistry, Mathematics, Economics, Computer Science and Electronics of The Bhawanipur Education Society College (The BES College), Kolkata, India.

After a vigilant period of two years due to Covid-19 pandemic, the Science Section of The BES College adapted the strategy to continue their scholarly efforts and motivate their students in writing research papers. This is unquestionable that inspiring under-graduate students to write a research paper based on the review work is not only an encouragement but also add fuel to the students towards becoming future researchers. The effort to publish this multidisciplinary journal is an attempt to create a thrust for research on upcoming science and technological breakthroughs among our students. Hence the journal stands out as an ideal forum for rapid dissemination of ideas and information.

The fair and unbiased peer-review system by the potential reviewers through their professional evaluation of the manuscripts also assisted the journal to get prominence at the outstanding level of research. Through my leadership and the tireless effort of the entire editorial board, we sincerely hope to be successful not only in encouraging research but also establishing a research aptitude for the students at the undergraduate level of the college. This in turn helps students to reach the global platform from which they can draw inspiration to accelerate their personal growth.

We will continue our journey in the future periodically through the call for papers as a special issue or contemporary issue on modern topics or strong areas of research. This will help us to showcase our scientific and technological endeavour and to improvise our policies for future publications and the reviewing processes.

Again, I convey my congratulations to our entire editorial board including the Section Patron, the executive editors of the topical collections, the Managing Editors, and Assistant Editors, as well as the External Referees, for working tirelessly to attract, review, and publish the best scientific topics in **Coherence: A Scientific Journal**. I would like to extend my special thanks to the BES College leadership for their excellent vision in guiding us in the robust development of our journal.

Before closing my message, I would like to invite everyone to submit their innovative research in future for continuation of the success of this journal. **Coherence: A Scientific Journal is the place to publish all the papers that have received the most insightful feedback from the peer-review process.** We are committed to publishing all the scientific discoveries and the innovative methods of research followed in the field of modern science and technological applications.

Last but not the least, I welcome you all to this journal; the journal which is yours and your students. With your support as authors, reviewers, and editors, I shall be the witness of a very bright prospect for **Coherence: A Scientific Journal** to serve science and technology in cutting-edge research.

Thank you. We hope you will find Coherence: A Scientific Journal informative.

Dr. Pinki Saha Sardar
